Advice About Eating Fish
What Pregnant Women & Parents Should Know

Fish and other protein-rich foods have nutrients that can help your child’s growth and development.

For women of childbearing age (about 16-49 years old), especially pregnant and breastfeeding women, and for parents and caregivers of young children.

- Eat 2 to 3 servings of fish a week from the “Best Choices” list OR 1 serving from the “Good Choices” list.
- Eat a variety of fish.
- Serve 1 to 2 servings of fish a week to children, starting at age 2.
- If you eat fish caught by family or friends, check for fish advisories. If there is no advisory, eat only one serving and no other fish that week.*

Use this chart!
You can use this chart to help you choose which fish to eat, and how often to eat them, based on their mercury levels. The “Best Choices” have the lowest levels of mercury.

Best Choices
EAT 2 TO 3 SERVINGS A WEEK

<table>
<thead>
<tr>
<th>Anchovy</th>
<th>Atlantic croaker</th>
<th>Atlantic mackerel</th>
<th>Black sea bass</th>
<th>Butterfish</th>
<th>Catfish</th>
<th>Clam</th>
<th>Cod</th>
<th>Crab</th>
<th>Crawfish</th>
<th>Flounder</th>
<th>Haddock</th>
<th>Hake</th>
</tr>
</thead>
<tbody>
<tr>
<td>Herring</td>
<td>Lobster, American and spiny</td>
<td>Mullet</td>
<td>Oyster</td>
<td>Pacific chub mackerel</td>
<td>Perch, freshwater and ocean</td>
<td>Pickerel</td>
<td>Plaice</td>
<td>Pollock</td>
<td>Salmon</td>
<td>Sardine</td>
<td>Scallops</td>
<td>Shad</td>
</tr>
</tbody>
</table>

OR

Good Choices
EAT 1 SERVING A WEEK

<table>
<thead>
<tr>
<th>Bluefish</th>
<th>Buffalo fish</th>
<th>Carp</th>
<th>Chilean sea bass/ Patagonian toothfish</th>
<th>Grouper</th>
<th>Halibut</th>
<th>Mahi mahi/ dolphinfish</th>
<th>Monkfish</th>
<th>Rockfish</th>
<th>Sablefish</th>
<th>Sheepshead</th>
<th>Snapper</th>
<th>Spanish mackerel</th>
<th>Striped bass (ocean)</th>
<th>Tilefish (Atlantic Ocean)</th>
<th>Tuna, Albacore/ white tuna, canned and fresh/frozen</th>
<th>Tuna, Yellowfin</th>
<th>Weakfish/seatrout</th>
<th>White croaker/ Pacific croaker</th>
</tr>
</thead>
</table>

Choices to Avoid
HIGHEST MERCURY LEVELS

<table>
<thead>
<tr>
<th>King mackerel</th>
<th>Marlin</th>
<th>Orange roughy</th>
<th>Shark</th>
<th>Swordfish</th>
<th>Tilefish (Gulf of Mexico)</th>
<th>Tuna, bigeye</th>
</tr>
</thead>
</table>

*Some fish caught by family and friends, such as larger carp, catfish, trout and perch, are more likely to have fish advisories due to mercury or other contaminants. State advisories will tell you how often you can safely eat those fish.
